

A Virtual Work Experience in collaboration with The Industrial Cadets

Are you aged 14-16 and looking for real world work experience?

Join BAE Systems Maritime teams for a one week virtual placement and earn a Silver Industrial Cadet Award.

Monday 5 July to Friday 9 July 2021

Running from 10:00 to 15:00 with a 12:00 finish on Friday

BAE Systems designs, builds and maintains naval ships and submarines, as well as their state of the art combat systems and equipment. Every year we offer exciting opportunities for school leavers and graduates on our award-winning apprentice, intern and graduate programmes.

In this virtual work experience, you will join students from various schools to develop your skills and experience through virtual live sessions and online activities devised and delivered by our apprentices and engineers. You will get to work on an individual project and spend time with our colleagues who are designing and building the next generation of ships and submarines.

To register please ask your teacher for more information on how to apply
